iNTELLIGENT
Asset Lifecycle Management

Software that delivers a triple-digit ROI on the Operation & Maintenance of your Assets

75% of the Total Cost of Ownership for company-wide Assets lie in the **Operation** and **Maintenance** of those Assets. Business leaders require a way of reducing that cost in a sustainable manner in order to boost bottom-line profitability.

What is Aladdin?

Aladdin, is an industry-leading, Cloud-based solution, supported by an in-field local team of Asset and FM experts. Aladdin, helps you enforce compliance to best-practices that automate several labour intensive , time consuming and error-prone processes through Web and Mobile apps that connect the office to the field. Aladdin, fuels iNTELLIGENT business decisions to optimize business operations and boost your profits.

Why customers use Aladdin?

- Reduce the cost of Operating and Maintaining Assets in 5 key business areas:

  1. Asset Acquisition;
  2. Labour;
  3. Downtime;
  4. Inventory Management;
  5. Maintenance.

- Enforce best practices to sustain the highest levels of profitability.

- To exceed FM and Asset. Management KPIs.

- Access to Asset information at the fingertips to fuel smart decisions.

- Optimize utilization of company Assets and resources

Reliable, Secure & User-friendly

TECOM Community Management have worked with SGE to develop an Asset Management Manual. The end result was a comprehensive manual that formed the basis for TECOM Community Management to define their infrastructure and building assets as well as plan their maintenance over the life cycle. I am pleased to recommend their services to other companies looking at setting standards in Asset Management

- Mohammad Rezek, Director Community Enhancement, TECOM Group
